A920 pro

4/14

The elegance of a redesigned TPE

A920 pro payment terminal complies with the PCI 6 standard. It is equipped with a high definition camera allowing enrollment in the loyalty program.

It facilitates transactions by accepting all payment methods:

- Fuel card (contact and contactless)
- Mobile Money
- Electronic wallet (Wallet)
- Gasoline Ticket
- Gift ticket
- Equalization of deliveries

It contributes to loyalty through digital payment on your network of stations, shops and garages.

**CONTACT &
CONTACTLESS**

**ACCEPT ALL YOUR
PAYMENT MEANS**

SPECIFICATIONS

- Android 8.1 or 10
- Cortex A53 processor
- 5.5" capacitive touchscreen
- 4G + Wi-Fi + Bluetooth
- Contactless + chip
- PIN code + magnetic strip
- 5MP front camera + 8MP rear camera
- Professional scanner
- Long-lasting battery 5,150 mAh / 3.7 V
- Fast printer
- PCI PTS 5.x (Android 8.1) or 6.x (Android 10) SRED

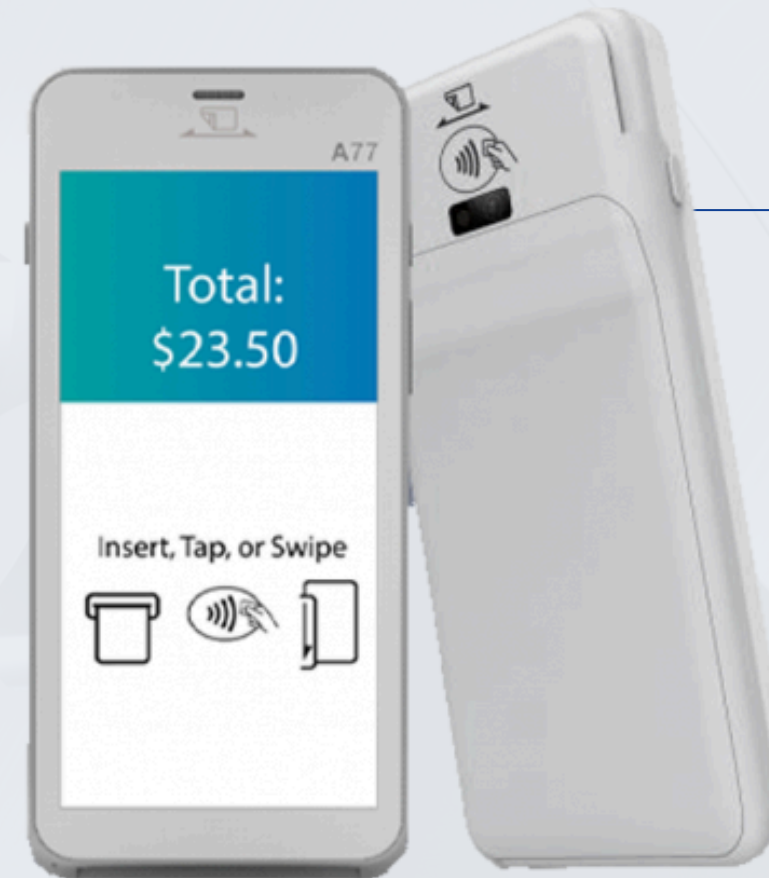

A77

The new Mobile terminal

The A77 complies with the PCI 6 standard. Specially designed for stores, mobile sales (Digital Supply Chain), and garages. The terminal is equipped with CaSys software and can allow you to make secure transactions and accept the following payment methods:

- Fuel card (contact and contactless)
- Mobile Money
- Electronic wallet (Wallet)
- Gasoline Ticket
- Gift ticket
- Point of sale management (Stock & Inventory)
- Digital Supply Chain (for your delivery trucks)

This terminal is a complete and optimized solution for managing your store, as well as your loyalty program.

**CONTACT &
CONTACTLESS**

**ACCEPT ALL
YOUR PAYMENT
MEANS**

SPECIFICATIONS

- Android 8.1
- Cortex A53 processor
- 5.5" capacitive touchscreen
- 4G + Wi-Fi + Bluetooth
- Contactless + chip
- PIN code + magnetic strip
- 5MP front camera + 8MP rear camera
- Professional scanner
- Long-lasting battery 5,150 mAh / 3.7 V
- Fast printer
- PCI PTS 5.x (Android 8.1) or 6.x (Android 10) SRED

E800

Cash management system

The E800 is much more than just a payment terminal. It is a real management tool. Thanks to its Android operating system, you can personalize and instantly print your cash receipts. The terminal integrates your loyalty program and Casys software, allowing you to accept all your payment methods:

- Fuel card (contact and contactless)
- Mobile Money
- Electronic wallet (Wallet)
- Gasoline Ticket
- Gift ticket
- Specialized management software for Service Stations

**Integrated
cash register
software**

SPECIFICATIONS

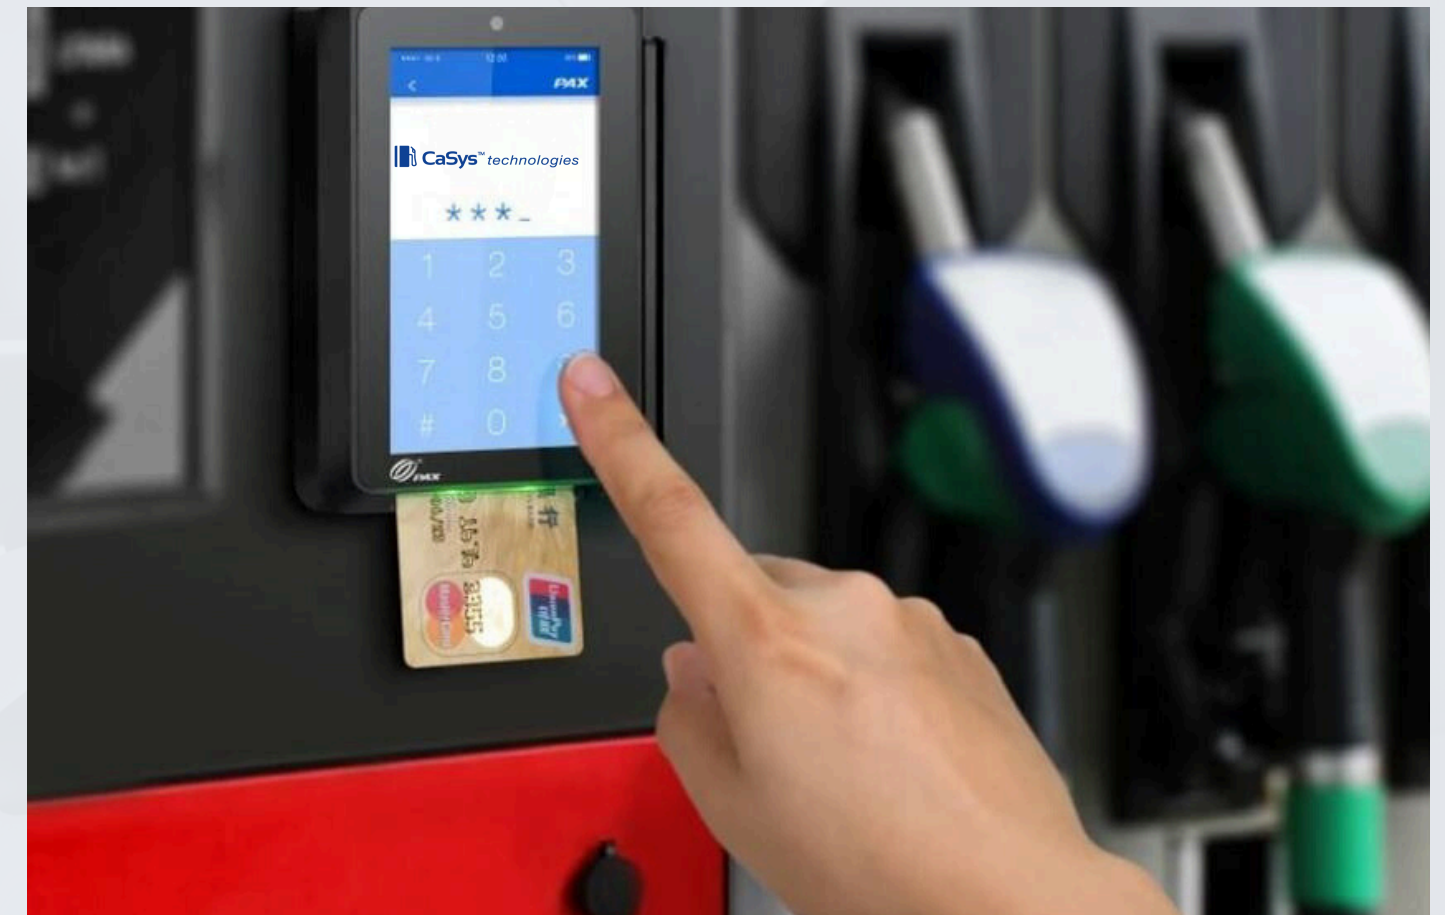

- Cash register software integrated into the terminal
- Payment by Card, Mobile Money, Value voucher
- Printing cash receipts
- Inventory PDA
- Android 6.0+
- A7 16GB Flash + 2GB RAM
- Expandable by Micro SD card up to 64GB

IM30

Payment terminal integrated into the pump

The IM30 allows you to optimize the self-service fuel purchasing process at your stations. It is integrated directly into the pump and therefore does not require civil engineering work. The IM30 has many advantages such as NFC technologies. In addition to being ATEX CE and PCI DSS certified, this terminal allows transactions via the following payment methods:

- Fuel card (contact and contactless)
- Mobile Money
- Electronic wallet (Wallet)
- Gasoline Ticket
- Gift ticket
- VISA and e-Visa
- Remote collection of pump data...

SPECIFICATIONS

- Terminal integrated into the pump
- Payment by Card,
- Mobile Money,
- Petrol Ticket
- Integrated NFC technology
- No civil engineering works
- ATEX CE certified
- Android 10
- Chip and PIN
- Contact | Contactless
- Magnetic strip

Pump control system

Casys FCC is an ATEX CE certified system, equipped with the Fusion v3 Wireless box, which allows you to create an innovative and secure ecosystem around your service stations. With this system you will be able to:

- Remotely manage the display of prices,
- Collect pump indexes,
- Control your pumps with your TPE,
- Reduce errors and the risk of fraud,
- Monitor station activity in real time (Track, Shop, Garage)...

Thanks to its wireless connectivity, installation is simplified and maintenance costs are significantly reduced.

SPECIFICATIONS

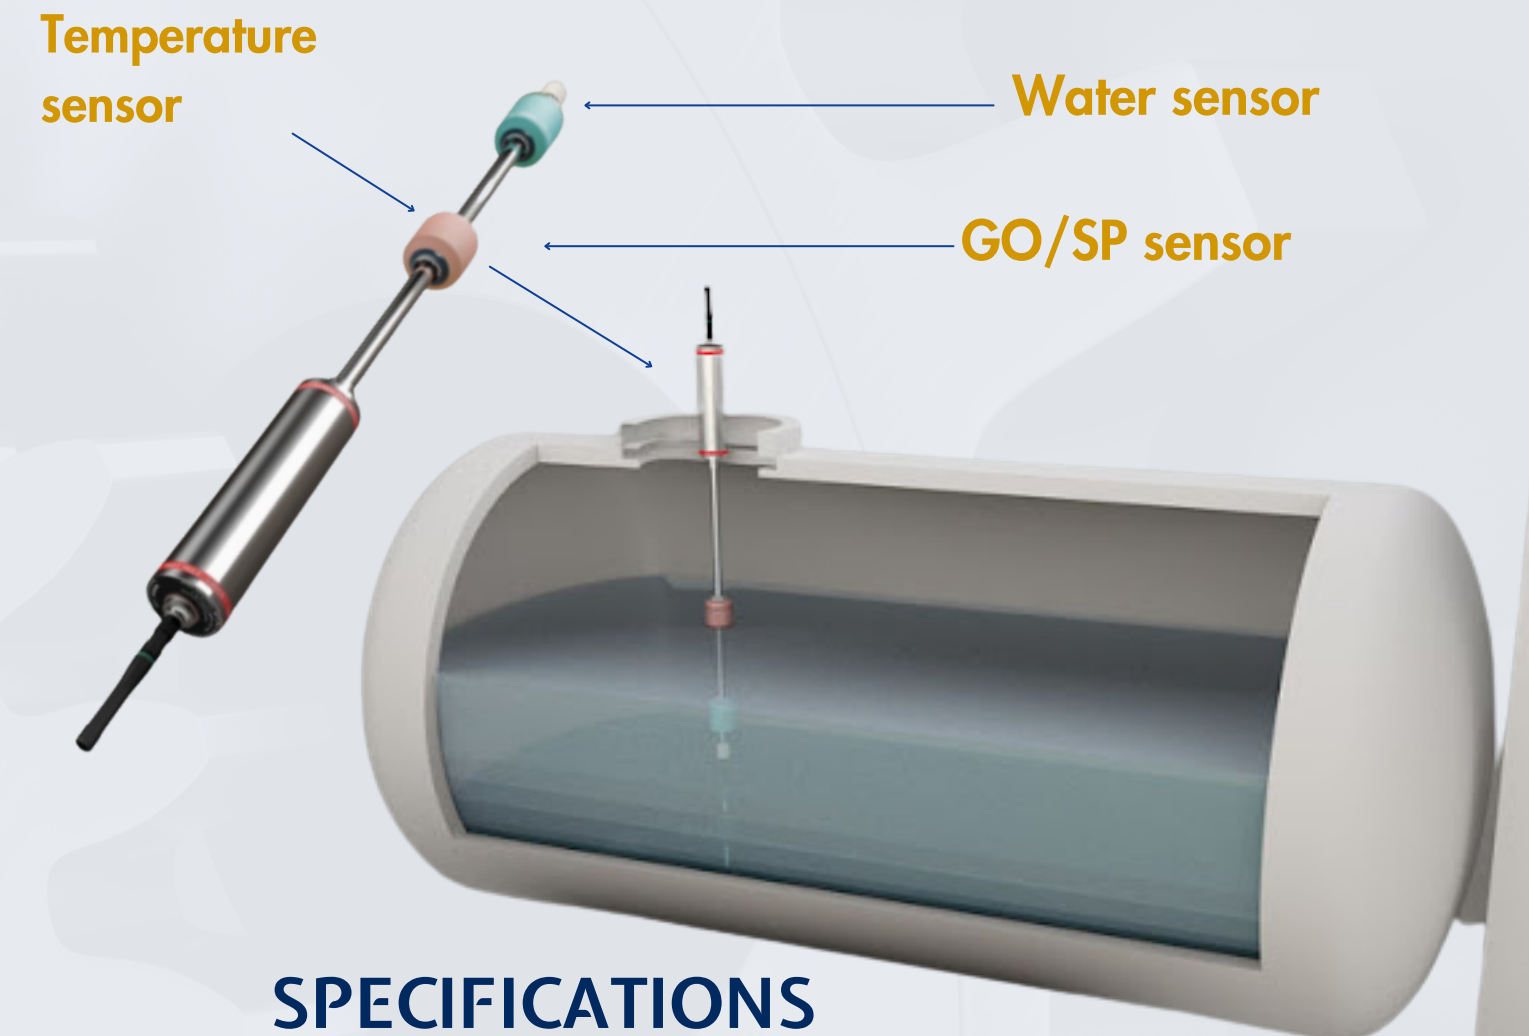

- Pump control (Fusion v3 box from Dover FS)
- Collection of indexes,
- Price change,
- ATEX CE certified,
- Complies with IFSF standards,
- Cable-free connectivity.

GAUGE SYSTEM (ATEX CE)

High-precision telemetry in your tanks

Casys Telemetry is an ultra-precise measurement system that facilitates fuel management at your stations. ATEX CE certified, it complies with regulatory standards for hydrocarbons. With this system, you will be able to:

- Monitor fuel stock levels in real time,
- Control daily fuel inputs & outputs,
- Facilitate equalization management with relevant data
- Setting up your ASTM tables

SPECIFICATIONS

- Real-time fuel stock data collection
- Control of temperature level and density
- ATEX CE certified,
- Complies with IFSF standards,
- Cable-free connectivity.
- Gauge Start Italiana (Atex CE)

CASYS LOYALTY PROGRAM

A loyalty program designed to suit you

Strengthen the loyalty of your customers each time they visit the station. With this innovative loyalty program based on a sticker system (RfID Tag) you will be able to:

- Monitor the frequency of vehicles passing through a station via a Back Office;
- Have information on vehicle type (Taxi, Fleet, Truck);
- Motivate your customers to download your mobile application in order to consult their loyalty points and receive promotions;
- Identify stickers with a large volume of transactions by means of payment (Mobile Money) and thus build a card or E_card offer in order to earn loyalty points with each purchase;
- Generate Gift Tickets and discount coupons via the **Casys Broadcast ERP** to reward the loyalty of your customers.
- GDPR compliance

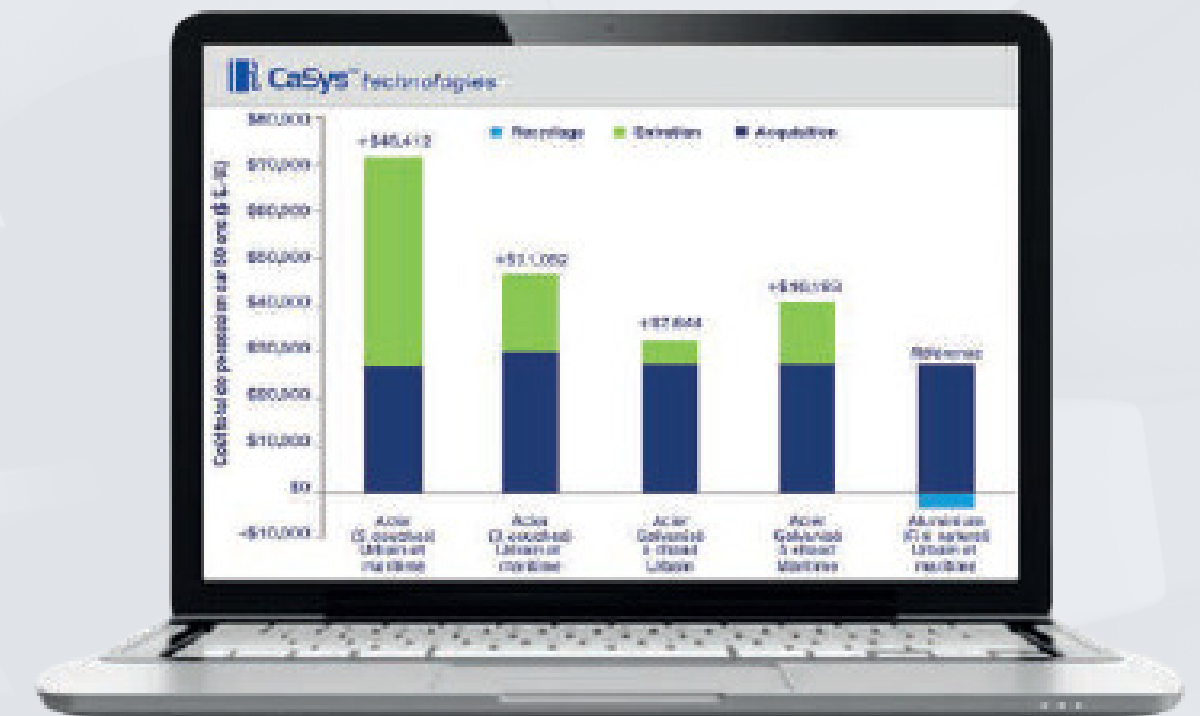

Reading the Sticker via Rfid with the TPE

A tool to help with action

Centralize all your analytical data and information relating to transactions at your service stations. Thanks to Casys Data-Pilot you will be able to:

- View transaction data by payment method (Fuel Card, Mobile Money, Value Voucher);
- Send notifications to Applications, the web client and the TPE
- Monitor the evolution of sales by payment method in real time on graphs;
- Monitor the nature of fuel, lpg, lubricants, store, garage purchases made at your stations;
- Organize gift voucher campaigns to support your sales...

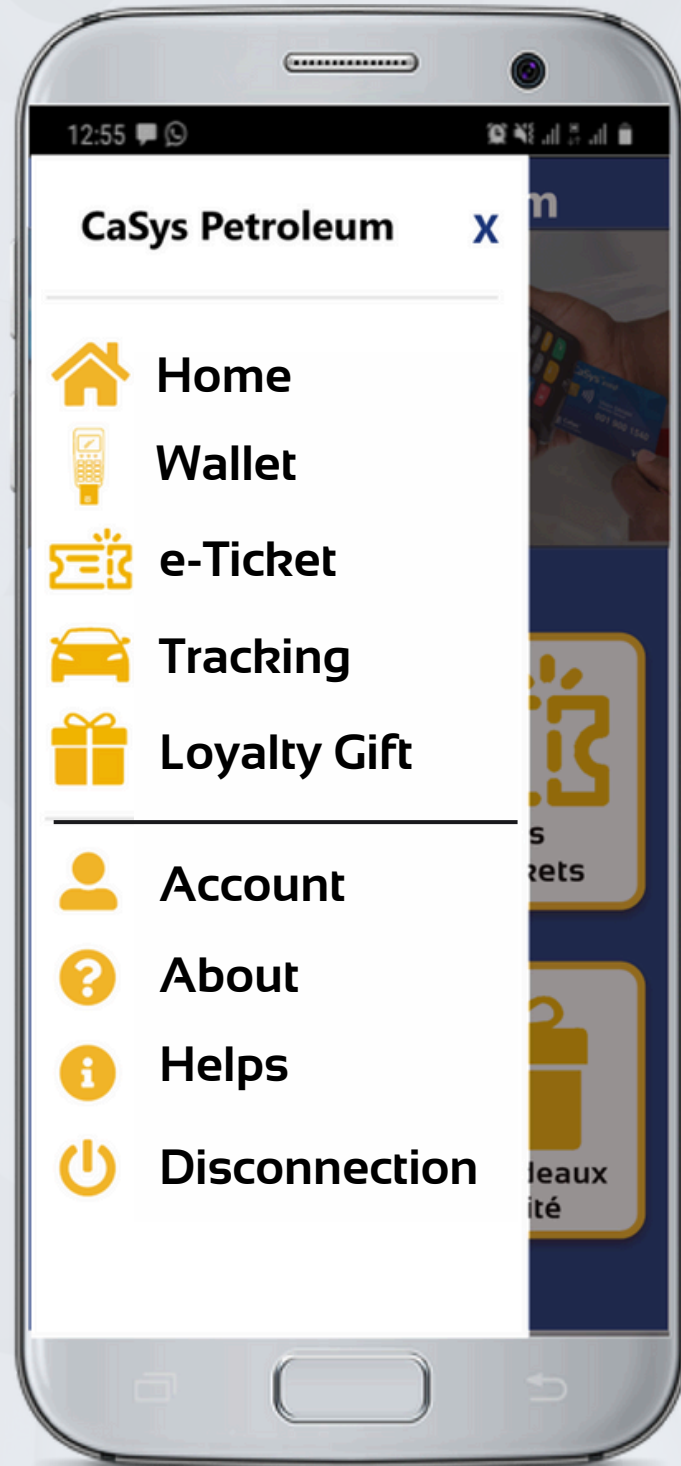

MEDIA BOX (Web TV)

An effective means of communication

MEDIA BOX allows you to create your own private TV channel on your gas stations. It will be customizable for the broadcast of content based on generative AI, the theme of which will be the station's products and services. You are entering the generative AI era at a lower cost. With **MEDIA BOX**, you will be able to:

- Boost your customer relations with interactive communication;
- Develop an interactive sales channel using the QR code on the screen;
- Create a communication channel on your stations and cafeteria;
- Position your company in innovation with generative AI.

Casys City loyalty applications are powerful tools for creating a lasting bond with your customers. This App is fully customizable to your company's colors and logo. This allows for perfect integration into your brand image and **reinforces the coherence of your communication**. In addition, the Casys city application allows you to:

- Improve customer relations.
- Increase attendance at your points of sale.
- Build customer loyalty.

- 1 My wallet / Wallet (e-Card)**
- Check your e-card balance
 - Recharge your e-card using Mobile Money
 - Buy fuel

- 2 Loyalty program**
- Earn loyalty points while passing through the station
 - Check your loyalty points via the app
 - Win gifts, rewards and discount vouchers.

- 3 Garages**
- Organize appointments in approved garages
 - Consult the visit history and maintenance frequencies of your vehicles.

- 4 E-Tickets**
- Find your fuel tickets in digital format
 - Share your tickets with friends and family
 - Use your tickets on your stations
